**DETAILED ACTION**

***Election/Restrictions***

Newly submitted claim 14 directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: Claim 14 is directed to a method for making the disclosed gas sensor. The gas sensor of independent claim 8 could be made by a method comprising different steps or a different sequence of steps, and including different component materials in its manufacture. For example, the method of making the gas sensor in claim 14 involves the step of gelling silica fine powder. Whereas the gas sensor as recited in claim 8 does not specifically require the incorporation of silica fine powder or silica gel.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claim 14 is withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

This application is in condition for allowance except for the presence of claim 14 directed to a withdrawn, non-elected invention. Applicant is given ONE MONTH or THIRTY DAYS from the date of this letter, whichever is longer, to cancel the noted claims or take other appropriate action (37 CFR 1.144). Failure to take action during this period will be treated as authorization to cancel the noted claims by Examiner's Amendment and pass the case to issue. Extensions of time under 37 CFR 1.136(a) will not be permitted since this application will be passed to issue.

The prosecution of this case is closed except for consideration of the above matter.

***Allowable Subject Matter***

Claims 8 and 10 – 13 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claim 8, the cited prior art neither teaches nor fairly suggests a proton conductor gas sensor incorporating the thin nonporous metal plate having the recited diffusion control hole configuration.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
